Art Unit: 3722

1. Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The “at least one long side” of claim 1 does not have antecedent basis, and it should be more clearly set forth such that its location is clearer. See also claim 10 for this term, such that any amendment is consistent. The “longitudinal edge” of claim 3 does not have antecedent basis, and it should be more clearly set forth such that its location is clearer. It is possible that the one long side of claim 1 is the same as the longitudinal edge of claim 3, such that consistent terminology should be used if this is the case. Jumping ahead to claim 5, the “angle section edge” and “the end of the first leg in the longitudinal direction” do not have antecedent basis, and they should be clearly set forth in conjunction with how claims 1 and 3 are amended, taking care to avoid multiple terms for the same item. Claim 4 should more clearly state which one is “the one scale.” The transverse direction of claim 6 needs to be defined in order to clearly set forth the bore location. The “zero point” of claims 7 and 8 does not have antecedent basis. Claim 8 should also more clearly define the “angle section edge.” The face, inside surface, and outside surface of claims 10 and 11 should be given antecedent basis and have their locations clearly set forth. The transverse direction of claim 13 should be properly defined.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(d) the invention was first patented or caused to be patented, or was the subject of an inventor's certificate, by the applicant or his legal representatives or assigns in a foreign country prior to the date of the application for patent in this country on an application for patent or inventor's certificate filed more than twelve months before the filing of the application in the United States.

Art Unit: 3722

3. Claims 1-18 are rejected under 35 U.S.C. 102(d) as being barred by applicant's EPO 1277534. The filing date of the present application is October 9, 2003. The EPO document was published on January 22, 2003.
